News 2 new results for EPA pavillion

New data on Wyo. frack site await interpretation
The Associated Press
"We will be guided by science in the way we react to the investigation of impacts on water outside of Pavillion," Mead said in a mild prepared statement. Benzene is a hydrocarbon commonly associated with oil and gas development. Last year's EPA testing ...

[New Wyo. tests show less benzene in fracking zone](#)
The Associated Press
Researchers this time around decided they couldn't get enough water for a reliable sample from one of the wells the EPA drilled to test for pollution near the rural community of Pavillion. That low-flowing well

had the very high benzene level. In the ...
